

gui::Gadget::aligner

```
graph LR; A[gui::Gadget::aligner] --> B[gui::Gadget::getLocalBounds]
```

A diagram showing a call from the `aligner` member of the `gui::Gadget` class to the `getLocalBounds` member of the same class. The `aligner` node is shaded gray, and the `getLocalBounds` node is white. A blue arrow points from the `aligner` node to the `getLocalBounds` node.

gui::Gadget::getLocalBounds
